

Derby Fence

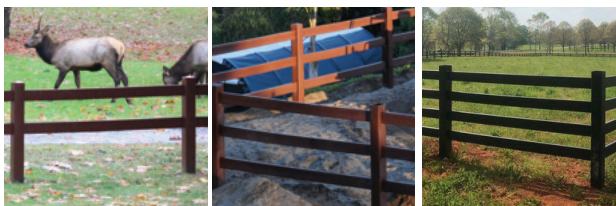

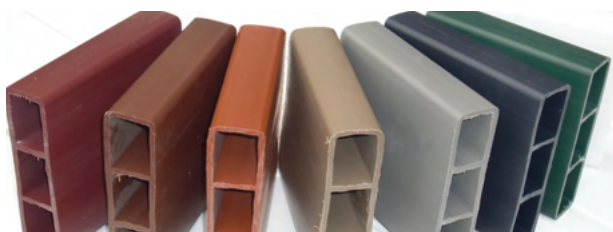

Safe, Durable and Maintenance Free
fencing for Livestock and Horses in
all locations and climates.

From the farm or ranch to suburban
developments.

STANDARDS & BENEFITS

High Density Polyethylene Fencing:

- 8 colors to choose from: White, Black, Cedar, Brown, Redwood, Grey, Hunter Green, Weather Wood
- Available in 2, 3, and 4 rails with 7', 7.5' or 8' posts
- Posts are 5.5" x 5.5" and weigh almost twice that of a PVC post
- Ultra-violet stabilizers are continuous throughout the materials
- Wall thickness is approximately double that of other fencing
- No pre-drilling necessary- screws, nails and staples can be used to fasten HDPE with screw retention better than wood
- Safe, environmentally sound, and non-toxic
- Higher flexural strength than most other fencing products
- Performs well in extreme temperatures
- Impact resilient- will not splinter on impact
- Stain/Graffiti resistant

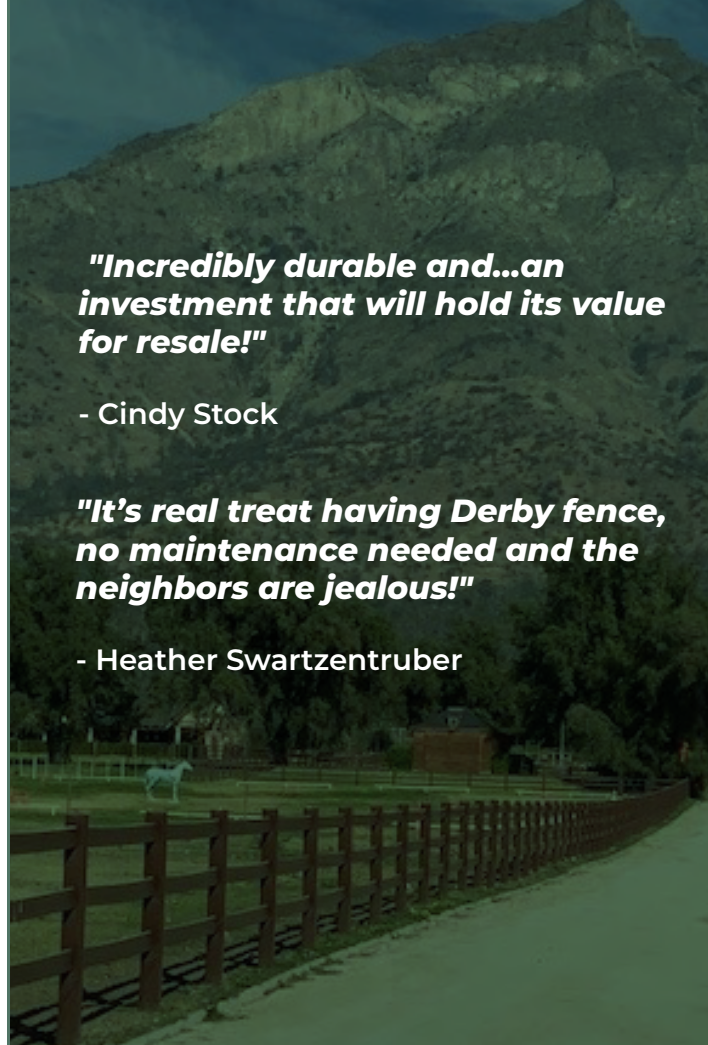

"Incredibly durable and...an investment that will hold its value for resale!"

- Cindy Stock

"It's real treat having Derby fence, no maintenance needed and the neighbors are jealous!"

- Heather Swartzentruber

Derby HDPE

**Safest, most durable,
fencing solution on the market.**

ENVIRONMENTALLY

Safe for Animals, Humans and the Ground

There are many environmental problems associated with PVC fencing. PVC can also be difficult to recycle. The HDPE that Derby Fence uses is inherently safe to the environment. Because Derby Fence uses nothing but UV stable HDPE, Derby Fence can easily be recycled at the end of its' useful life.

Derby Fencing reclaims 100% of its scrap production, thereby contributing nothing to the areas landfills, and recycles all its cooling water striving to be as Eco friendly as possible.

100% Made in the USA!!

SAFE & DURABLE Safety & Longevity

Our fencing is safe for containing livestock. Derby fence will not splinter or cause injuries.

Derby Fence is one of the toughest horse fencing solutions on the market, is made to withstand years of abuse from elements of your horses.

Derby rails have a reinforced rib design that prevents deformation and limits sagging between posts.

OUTSTANDING Beauty & Performance

Derby Fences are strong, durable, aesthetically beautiful, easy to clean, stain resistant and maintenance free for years. The rails and post are manufactured out of high-density polyethylene (HDPE) materials that will not shatter or split in extremely cold weather. Derby Fencing withstands temperatures as low as -60 degrees Fahrenheit, contains no arsenic or chlorides and will not contaminate water or soil. HDPE is also impermeable to acids found in animal wastes.

TRADITIONAL SIZES Convenient Sizing

Derby Fence is manufactured in typical lumber sizes. Because Derby Fence is hollow it is lighter and easier to work with than wood fencing. An HDPE rail weighs about as much as a wooden rail of the same dimensions, and a post weighs about one quarter as much as solid wood of the same dimensions. Thick side walls add strength and firmness to HDPE fence products and eliminate the need for, and cost of, internal reinforcement with other materials.

Along with maintaining a traditional fence appearance, this traditional sizing enables easy replacement of traditional wooden fence components when needed.

Derby Fence is the right choice when looking for a fence that is safe for the animals, people and the environment.
